Appendix A

Assessment of IntraOcular Lens Implant Symptoms (AIOLIS) Questionnaire (Copyright by American Academy of Ophthalmology 2022, Images used with permission from University of Rochester)

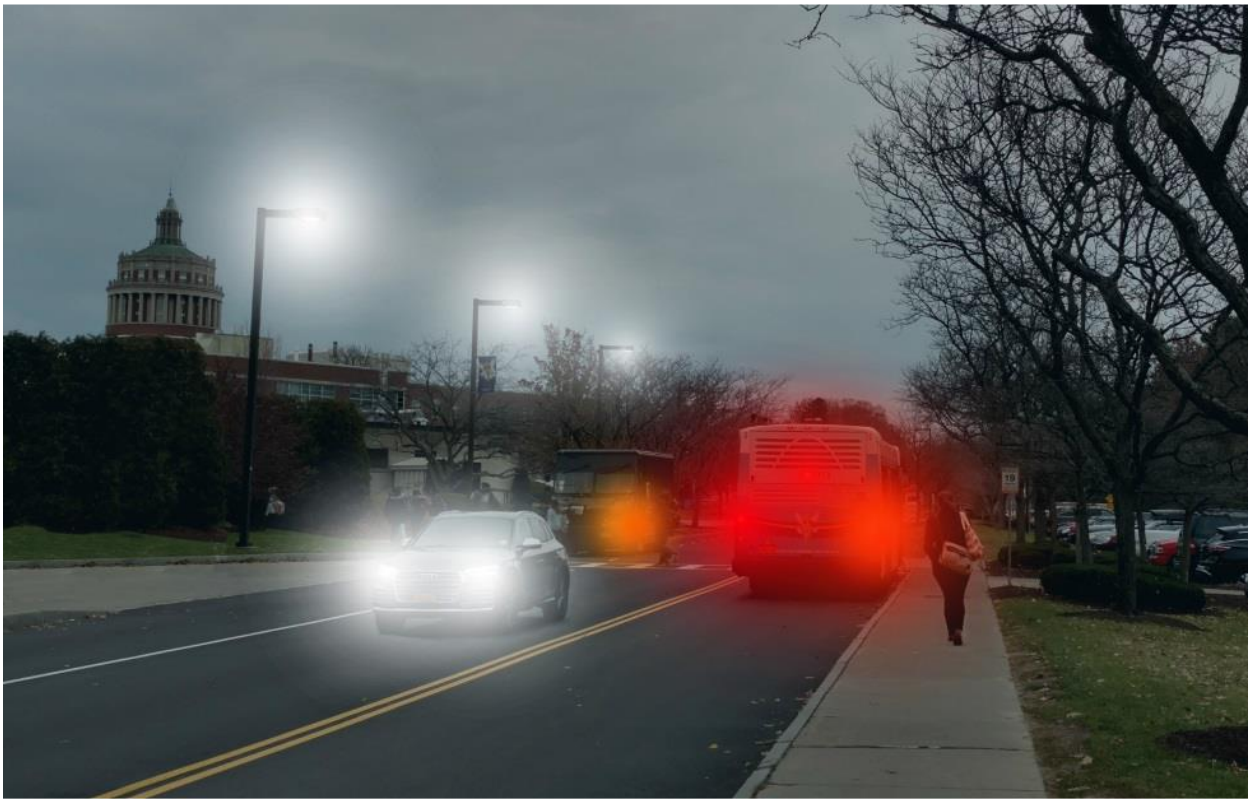

Below is a picture of a scene at dusk that represents what someone without any visual symptoms or problems would see.

For the next questions, we will show different versions of the same image the way that some people with vision problems might see it. Each picture provides an example of different vision problems or symptoms. Your own experiences may be similar or different from the examples we provide.

Snowballs

Snowballs are bright full circles that appear around a source of light, such as oncoming car headlights. Below is a picture that shows snowballs.

1. In the last 7 days, how often did you see snowballs?

   □ Never
   □ Sometimes
   □ Usually
   □ Always

2. How much were you bothered by the snowballs in the last 7 days?

   □ Not at all
   □ A little
   □ Somewhat
   □ Quite a bit
   □ Extremely

Halos

Halos are bright circles or rings that appear around a source of light, such as oncoming car headlights. Below is a picture that shows halos.

3. In the last 7 days, how often did you see halos?

   □ Never
   □ Sometimes
   □ Usually
   □ Always

4. How much were you bothered by the halos in the last 7 days?

   □ Not at all
   □ A little
   □ Somewhat
   □ Quite a bit
   □ Extremely

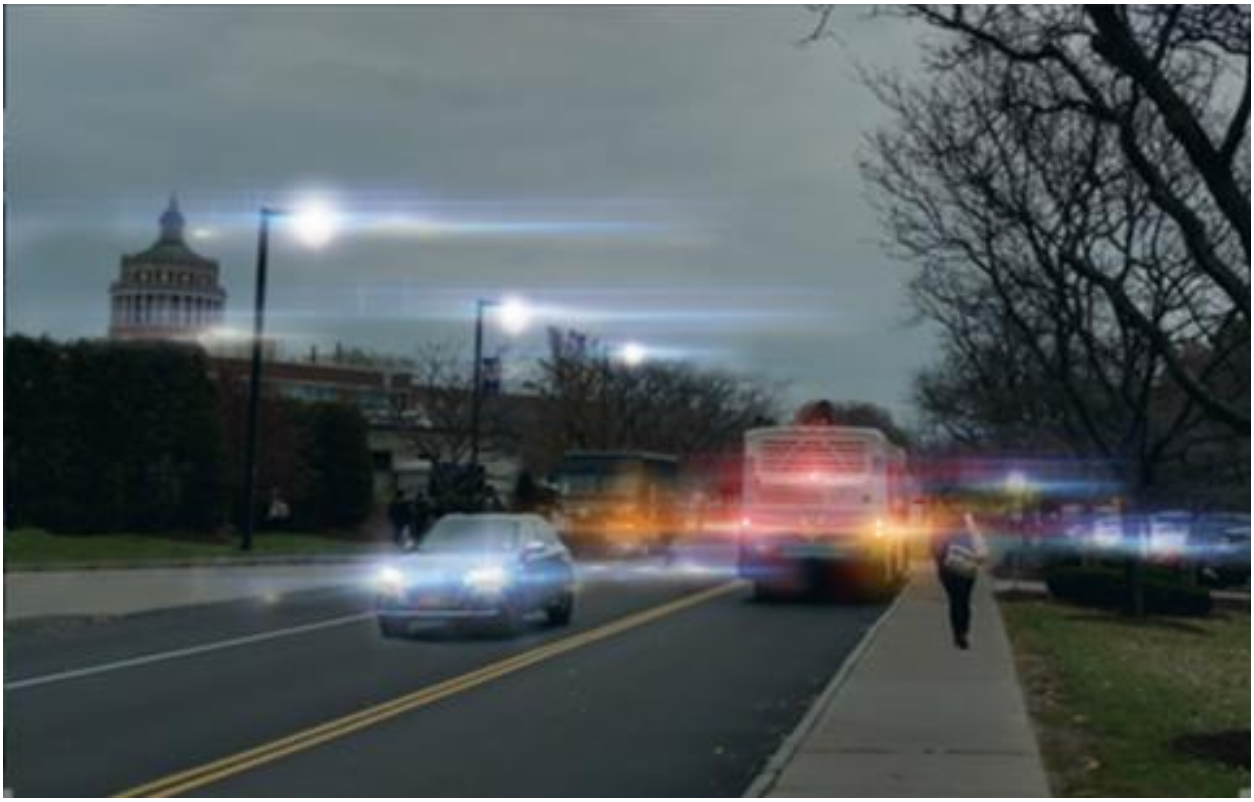

Starbursts or Streaks

Starbursts or streaks are line(s) or ray(s) that appear to come from a source of light, such as oncoming headlights. There may be one of many streaks coming from the source of light. Below are two pictures that show starbursts or streaks of light.

Starbursts

Streaks

5. <u>In the last 7 days</u>, how often did you see starbursts or streaks?

□ Never
□ Sometimes
□ Usually
□ Always

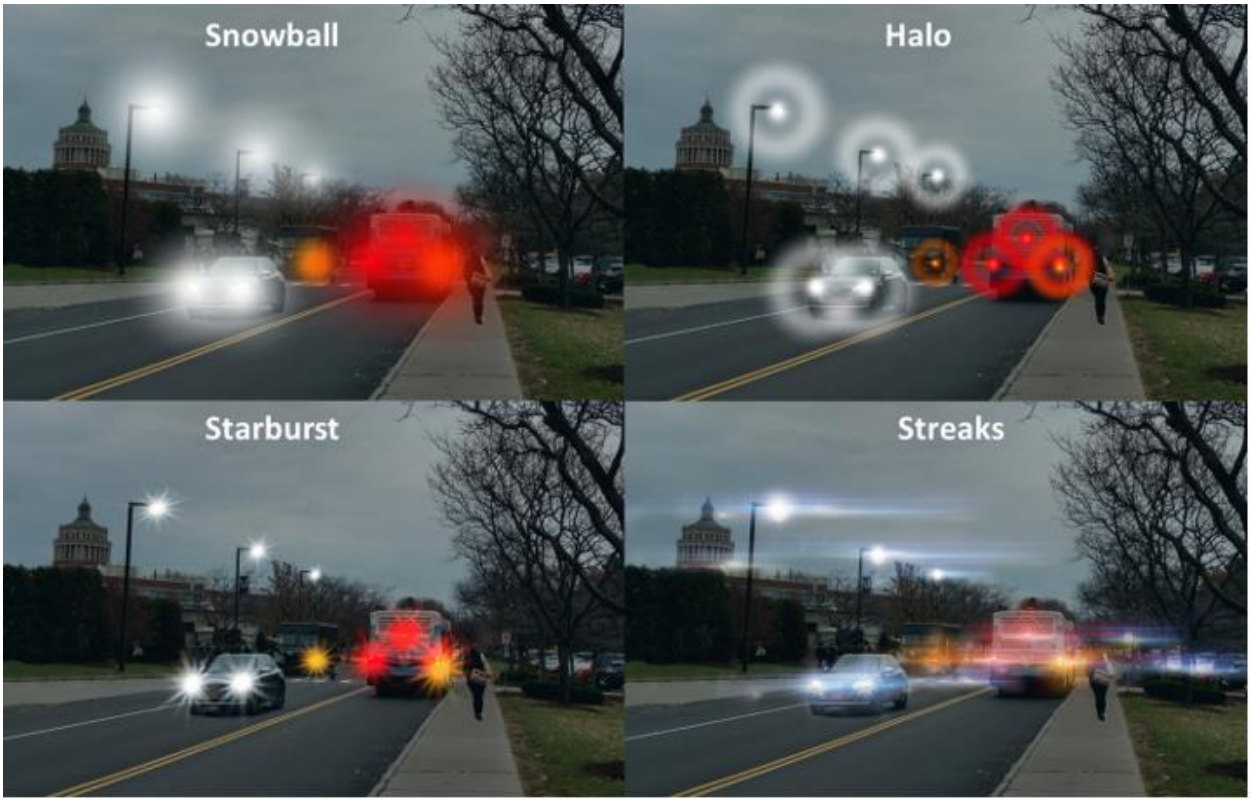

6. How much were you bothered by the starbursts or streaks in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Glare

Glare occurs when the object in view is blocked partially or fully by a dazzling light. Glare can occur from bright lights such as street lamps or headlights. Snowballs, halos, starbursts or streaks are all examples of glare and are shown below.

Glare

7. In the last 7 days, how often did you notice any glare during the day – such as loss of contrast and unwanted light from many or all directions?

□ Never
□ Sometimes
□ Usually
□ Always

8. How much were you bothered by the glare during the day in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

9. In the last 7 days, how often did you notice any glare during the night – that is, see any snowballs, halos, starbursts, or streaks?

□ Never
□ Sometimes
□ Usually
□ Always

10. How much were you bothered by the glare during the night in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Light flashes or streaks with eyes <u>open.</u>

Light flashes or streaks can come and go and may occur when looking at any light source. Light flashes with eyes open can occur at daytime or nighttime and appear like one or more arcs of bright light as shown in the two pictures below.

Daytime Arc Flash

Nightime Arc Flash

11. In the last 7 days, how often did you see light flashes or streaks with your eyes open during the day or at night?

    □ Never
    □ Sometimes
    □ Usually
    □ Always

12. How much were you bothered by the light flashes with your eyes open in the last 7 days?

    □ Not at all
    □ A little
    □ Somewhat
    □ Quite a bit
    □ Extremely

Light flashes with head movement <u>when eyes are</u> <u>closed.</u>

Light flashes are pinpricks or spots of light in the field of vision. Light flashes can look like jagged lines or appear wavy, like heat waves. They can seem like shooting stars or lightning streaks.

13. <u>In the last 7 days</u>, how often did you see light flashes with your eyes closed?

□ Never
□ Sometimes
□ Usually
□ Always

14. How much were you bothered by the light flashes with your eyes closed in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Rings and Spider Webs

Rings and spider webs are seen with bright lights such as the headlights in the picture below.

15. In the last 7 days, how often did you see rings and spider webs?

□ Never
□ Sometimes
□ Usually
□ Always

16. How much were you bothered by the rings and spider webs in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Hazy Vision

Hazy vision is when what you are looking at appears foggy. Below is a picture that shows hazy vision.

17. In the last 7 days, how often did you have hazy vision?

□ Never
□ Sometimes
□ Usually
□ Always

18. How much were you bothered by the hazy vision in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Blurry Vision

Blurry vision is when objects are not seen clearly. Below is a picture that shows blurry vision.

19. In the last 7 days, how often did you have blurry vision?

□ Never
□ Sometimes
□ Usually
□ Always

20. How much were you bothered by the blurry vision in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Distortion

Distortion refers to straight lines appearing tilted, stretched, or crooked. Below is a picture that shows distortion.

21. In the last 7 days, how often did you have distortion in your vision?

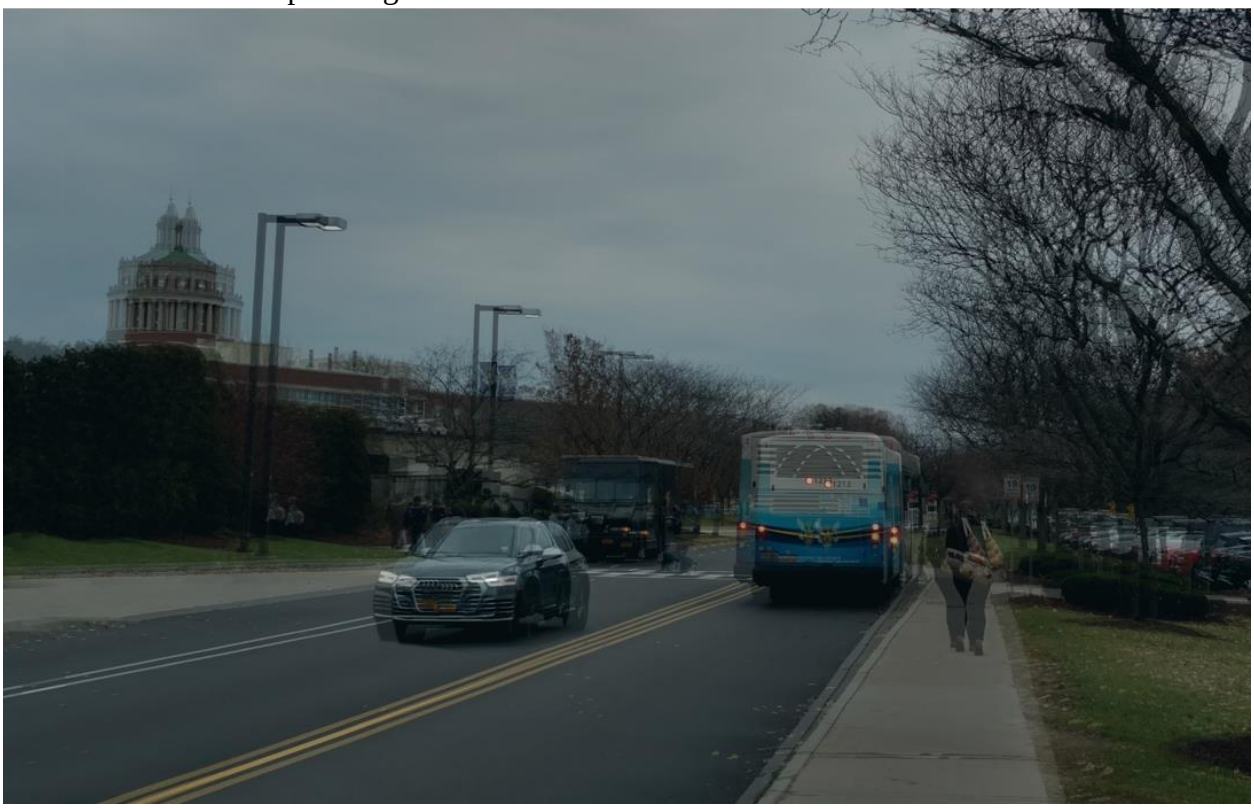

□ Never
□ Sometimes
□ Usually
□ Always

22. How much were you bothered by the distortion in your vision in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Double or multiple images

Double or multiple images refers to seeing two images of a single object. Below is a picture that shows double or multiple images.

23. In the last 7 days, how often did you see double or multiple images?

□ Never
□ Sometimes
□ Usually
□ Always

24. How much were you bothered by the double or multiple images in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Dark, crescent-shaped shadow or dark line in side of your vision.

Below is a picture that shows a dark, crescent-shaped shadow or dark line in the side of vision.

25. In the last 7 days, how often did you see a dark, crescent-shaped shadow or dark line in the side of your vision?

    □ Never
    □ Sometimes
    □ Usually
    □ Always

26. How much were you bothered by the dark, crescent-shaped shadow or dark line in the side of your vision in the last 7 days?

    □ Not at all
    □ A little
    □ Somewhat
    □ Quite a bit
    □ Extremely

Floaters

Below is a picture that shows floaters.

27. In the last 7 days, how often did you see floaters?

□ Never
□ Sometimes
□ Usually
□ Always

28. How much were you bothered by the floaters in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

Flickering or shimmering images

29. In the last 7 days, how often did you see flickering or shimmering images?

□ Never
□ Sometimes
□ Usually
□ Always

30. How much were you bothered by the flickering or shimmering images in the last 7 days?

□ Not at all
□ A little
□ Somewhat
□ Quite a bit
□ Extremely

31.Would you say your vision now is poor, fair, good, very good, or excellent?

□ Poor
□ Fair
□ Good
□ Very Good
□ Excellent

32.How satisfied are you with your vision right now?

□ Completely satisfied
□ Very satisfied
□ Somewhat satisfied
□ Somewhat dissatisfied
□ Very dissatisfied
□ Completely dissatisfied

33.How well are you able to see now without glasses, contact lenses, a magnifier, or other corrective devices?

□ Perfectly well
□ Very well
□ Pretty well
□ Not very well

34.How would you rate your eyesight for seeing things at a distance (e.g., watching television or driving) without glasses, contact lenses, a magnifier, or other corrective devices in the last 7 days?

□ Poor
□ Fair
□ Good
□ Very good
□ Excellent

35.How would you rate your eyesight for seeing things at an intermediate distance (e.g., looking at a desktop computer or dashboard in the car) without glasses, contact lenses, a magnifier, or other corrective devices in the last 7 days?

□ Poor
□ Fair
□ Good
□ Very good
□ Excellent

36.How would you rate your eyesight for seeing things close up (e.g., reading newspaper print or a printed book) without glasses, contact lenses, a magnifier, or other corrective devices in the last 7 days?

□ Poor
□ Fair
□ Good
□ Very good
□ Excellent

37.How often did you wear glasses or contact lenses to see in the last 7 days?

□ All of the time
□ Most of the time
□ Some of the time
□ A little of the time
□ I didn't wear glasses or contact lenses at all in the last 7 days

Thank you for taking the time to complete the survey.
